## Bookmark new documents

by  
[Craig Lordan](#)

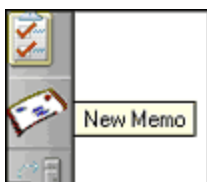

With Notes R5, you can create Bookmarks to just about anything, such as databases, existing documents, views, and Web pages.

Did you also know you can create a Bookmark for *new* documents?

Let's try it with a mail message. In your mail database, create a new memo:

Now click and drag the New Memo task button to your Bookmark bar.

Whenever you want to create a new mail message, just click your New Memo Bookmark!

**Note:** You can put your "new document" Bookmarks anywhere, either on the Bookmark bar or inside your Bookmark folders.
